

Am Pentatonic Scales

Ok...These are the five different shapes of the Pentatonic scale. As there are five notes that make the scale we have created five different shapes using each note in turn. as we are in the key of Am the notes that we are using are A, C, D, E & G.

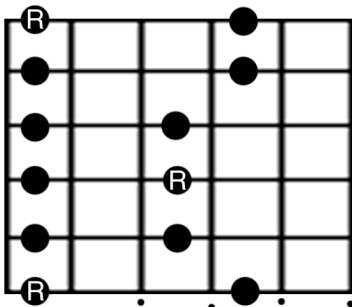

A C D E G
R b3 4 5 b7

Each shape links into the next and will eventually help you solo all over the fretboard, but you will need to memorise them first!!

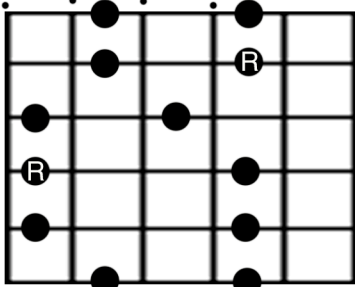

Also these are moveable shapes, so you can play them in any key.

Try and learn all 5 shapes.

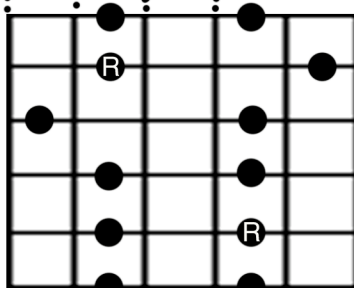

Good luck!
